GOD'S POWER LINES PRESS REVIEW

CONNECT WITH GOD IN THE MOST NATURAL WAY OF ALL

Shir le highlights traces of God seen and felt throughout all of His creation

God's Power Lines teaches readers how to engage the spiritual aspects of God's character by understanding the physical aspects of His creation. This writing steps out of the box of established patterns of thought and action that have been passed down to people through traditions; and steps into the physical principles of the universe established from the foundations of time.

REVIEWS

God's Power Lines greatly influenced my spiritual walk and at the same time was a science lesson stimulating my brain on a deep spiritual level. Shir Le was inspiringly transparent about her personal experiences and feelings. She used an abundance of scripture as reference not only to provide the instruction for help but to also validate her points.

God's Power Lines is a science text book; an inspirational biography; and a devotional from beginning to end!

This very provocative book is in easy to read format and has a current that is electrifying to the soul and provoked me to do some heavy duty self-reflecting.

Just like electric current keeps our world powered up so must the "current" (prayer) be active and flowing to our Heavenly Father to keep us filled with hope and also that He may be displayed through us in magnificent ways.

This book is a great resource to teach us how to stay connected to the current of God so He will be able to use us as a brilliant light to glorify Him and His kingdom. *Amazon reviewer--- kidp*

This book helped me get back to the Bible and God for all answers to my loneliness and depression over losing a son and my husband. I came to realize that God was with me all the time. If anyone is going through situations, problems or circumstances where there seems to be way out, read this book and it will point you in the right direction to receive "that peace that passeth all understanding." *Amazon reviewer --- Betty*

A simple outline of how electricity works and her parallel with GOD being the source of our connection with a true and balanced life. The fact that without electricity and the chemical balance of positive and negative ions, their work in our bodies would not exist. Yashua created our minds and bodies; to keep in wholeness is to keep the connection with our creator always open. Enjoyed all her personal experiences. *Amazon reviewer --- Yvonne Koller*
